Abstract (en)

[origin: EP2058237A1] The box (1) has screws and a screwdriver bit (3), where the box is folded by a pre-cut part of a semirigid, flat material e.g. cardboard. The screwdriver bit is inserted into a counter bracket (1.6) at a folding edge in an opening region. The screwdriver bit extends over a longitudinal center of the folding edge at which the screwdriver bit is formed. The counter bracket is formed at the folding edge, where a side edge of a lid (1.2) passes in a diagonal bracket (1.3). The screwdriver bit has engagement geometry for a screw head at both ends of the screwdriver bit.
