Abstract (en)

[origin: EP2058459A1] The closure (1) has a plate-shaped closure part (2) i.e. steel door leaf, supported rotatably in a building part. A panic releasing unit (3) is arranged on the closure part, where the panic releasing unit is movable from a normal position (8) to a panic position. A locking device is located in a locking position in the normal position of the panic releasing unit, and the locking device is moved from the locking position to a releasing position in the panic position of the panic releasing unit. A securing device (10) shields the panic releasing unit.
