Abstract (en)  
[origin: EP2058466A2] The window connection band (1) has a band, which has two diffusion variable zones (2,3). The former diffusion variable zone is made of plane material in a direction of a width. The band is effective from vapor permeable till high diffusion inhibiting depending on its moisture content. A permanent adhesive connection is produced with the window frame and both the other adhesive areas (4,5,6) are provided.
