Abstract (en)

[origin: EP2058478A1] The adjustment device (1) has a pinion (7) of the adjustment device and a controller casing (4) made of a high-strength light metal alloy by pressurizing a single piece connected construction unit (16). The controller casing is supported with cam shafts (2) which are connected to rotors (5). The construction unit has closing covers (14). An independent claim is included for a method for manufacturing an adjustment device.
