Abstract (en)  
[origin: WO2008028642A1] The invention relates to a hair removal device comprising a housing (1) and a hair removal head (3) which is connected to the housing by means of a support structure (2) and is used for cutting hair and/or plucking hairs. At least one transformable element (9) is provided on the housing (1) and/or on the hair removal head (3). Said transformable element (9) can be deflected beyond a predetermined measure from the starting position thereof against the force of a spring element (11) when the support structure (2) is deformed and acts on the transformable element (9).
