Abstract (en)

[origin: WO2008029049A1] The invention relates to a panel assembly (100) in which two panels (101, 102) are connected together, in which assembly a surface of each of the two panels comprises a step (105, 106), in such a way as to form an upper level (112, 114) and a lower level (113, 115), the two panels being connected together along their lower levels. The sum of the heights of the steps of the two panels may be equal for example to the sum of the tolerance intervals accepted in the region of the joint between the two panels. The invention also relates to a method of making such a panel assembly.
