Abstract (en)
[origin: WO2008019845A1] The invention relates to a magazine device (1) for adjacent, planar elements (2), comprising at least one conveying apparatus (4) and at least one removing mechanism (3). The aim of the invention is to improve said magazine device (1) so as to increase the maximum capacity thereof and render the same more user-friendly and less prone to malfunction. Said aim is achieved by providing a retaining mechanism (8) in front of the removing mechanism (3) in the direction of travel.
