Abstract (en)

[origin: WO2008025522A1] The present invention relates to a method of producing bioalcohol, in particular ethanol or butanol, from biomass, in which the biomass is comminuted, the remaining biomass is fed to a fermentation and the alcohol is obtained from the product of the fermentation, characterized in that insoluble components and/or non-fermentable sugars are separated off from the biomass before the fermentation and/or yeast and bacteria are separated off after the fermentation.
