Abstract (en)
[origin: WO2008026983A1] A nut (10), arranged to be attached with threaded member (12) by means of rotation of the nut (10). The nut (10) comprises a main section (16) which comprises a first contact surface (20) arranged to contact a first surface (20) of an intermediate member (24) arranged with at least one opening (22). The nut (10) further comprises a fastening device (26) to attach the nut (10) with the intermediate member (24). The fastening device (26) comprises a main section (16) which is movable relative a second contact surface (30) which is arranged to contact a second surface (32) of the intermediate member (24), to optionally attach the nut (10) with the intermediate member (24).
