Abstract (en)
Truss sleeve, provided for covering a truss of for example a temporary structure on a stage on which various light and audio equipment and the like can be suspended. The truss sleeve comprises a tubular piece of elastic cloth having a predetermined unstretched circumference and a predetermined degree of elasticity, selected for tightly fitting around at least one common type of truss. The invention further relates to a combination of a truss with a truss sleeve and a method for erecting a temporary structure in which at least one of the trusses is covered by means of a truss sleeve according to the invention.
