Abstract (en)

[origin: EP2060730A2] The seal (D) has one or multiple holding units. The sealing strip is supported in a sliding manner in the holding unit or units from an idle position in a sealing position. The other section or multiple other sections lies or rests of one or both sides of the sealing profile at a groove wall or the outer side of the door wing (F) or window wing in the sealing position of the sealing strip.
