Abstract (en)  
[origin: EP2060842A1] The connection unit consists of a line (1) and a connecting device (2). The inner circumference (U iV) of the connecting device is basically equal to the inner circumference (U iL) of the line. An end sector of the line can be pushed onto the connecting device. The line may be at least partly encased in a net, and at least partly made of plastic.
