Abstract (en)
[origin: EP2061119A2] The electrical contact element has a cylindrical socket contact (2) and a contact holder, where the contact holder is connected with the socket contact in a force-fit and form-fit manner. The contact holder is connected with a ring element, where the cylindrical socket contact encloses at a cylindrical tubular sheath. An inner diameter of the ring element is designed in a molded manner. An independent claim is included for a method for manufacturing an electrical contact element.
