Abstract (en)

[origin: WO2008031475A1] The present invention relates to a cleaver (8) having a crush-forged crank (6). In order to provide a cleaver having an improved manageability and surface feel, thereby preventing any possible injuries during the use of the cleaver, the invention proposes that the crank according to the invention extends from the handle (4) in the direction of the cutting edge (11) along the blade and/or edge surface (5) on the handle side.
