Abstract (en)

[origin: WO2008031718A1] The present invention relates to a platform (12) for carrying and transporting loads, with a frame (16), with a chassis (20) at the front end of the platform (12), by means of which the platform (12) is moveable, with a revolving belt (26) which is guided on a closed, endless track in the frame (16) and with a belt drive (40) for the revolving belt (26), wherein the chassis (20) can be retracted and extended in order to lower and raise the front end of the platform (12). In addition, the present invention relates to a transport device (10) with a platform (12) of the abovementioned type and a transport vehicle (14) which can be coupled thereto.
