Abstract (en)

[origin: WO2008031752A1] Vehicle, in particular rail vehicle, with a wagon body (102) which has a roof area (102.1) and a floor area (102.2), and at least one duct device (106) having a duct (106.1) for electrical leads, which duct (106.1) extends as far as the roof area (102.1) and/or the floor area (102.2) and is provided to hold at least one power distribution line (105.1) which primarily transmits electrical energy, and the duct device (106) is embodied in such a way that while the vehicle (101) is operating a flow (107) which cools the power distribution line (105.1) is at least temporarily formed in the duct (106.1).
