Abstract (en)

[origin: WO2008012441A2] The present invention relates to linear pyridazine compounds, and more particularly to those of these compounds which are oligopyridazine compounds, to processes for obtaining them, to their uses, and also to their reduction to pyrroles and to the uses of the pyrrole, pyridazinylpyrrole and oligopyrrole compounds obtained. The invention relates in particular to the uses as medicaments, in particular for treating pathologies such as cancer, bacterial infections or parasitic infections, and also the applications in the materials, environmental, electronics and optics field.
