Abstract (en)

[origin: GB2441141A] A security device for attaching a toolbox or similar object to a wall or floor surface comprising a first component consisting of a base plate 11 and upstanding post 12 securely fixed to the wall or floor surface, and a second component comprising a spreader plate 20 fixed to the bottom wall 36 of a toolbox or similar piece of equipment and adapted to receive a pin 21 which passes into a central bore of the post 12 of the first component and then a removable lock 30, for example a padlock, is located on the post 12 such that its locking peg 32 passes through aligned apertures in the post 12 and the pin 21. A central anchor 18 whose securing bolt 19 head is inaccessible within the bore of the post 12 prevents removal of the first component while the high security lock 30 prevents separation of the pin 21 from the post 12.
