Abstract (en)

[origin: WO2008030525A2] Exemplary methods and systems for providing network credentials are described. The exemplary method comprises receiving a credential request from a digital device over a network device, identifying a network record based on at least some information within the credential request, retrieving a network credential from a plurality of network credentials based on the network record, and transmitting a credential request response containing the network credentials from the plurality of network credentials to the digital device.
