Abstract (en)

The invention relates a leg rest (1) for a personal mobility vehicle, comprising at least one guide member (7) being pivotable about a first pivot point to at least one pivot position with respect to at least one seating area of the personal mobility vehicle and at least one extension member (11) being telescopically movable with respect to the guide member, the leg rest (1) further comprising at least one pull and/or push device at least indirectly connected to the extension member (11) for controlling at least one extension position of the extension member (11) with respect to the guide member (7), wherein the pull and/or push device is movable by at least one drive device comprising at least one rotating guide device guiding the pull and/or push device, wherein the rotating guide device is eccentrically supported as well as a personal mobility vehicle and a method for adapting the length of a leg rest (1).
