Abstract (en)
[origin: EP2062558A2] An operating table column (10) has a column shaft (11) which is adapted to have an operating table top fixed on it. A column foot (12) is secured in position on a floor. The column shaft is mounted on the column foot so as to be rotatable about a vertical axis (14) of the column shaft. A slip ring and a sliding contact that interact with one another are arranged on the column shaft and on the column foot to transfer electrical energy. The column shaft is freely rotatable in relation to the column foot while the transfer of electricity via the slip ring and sliding contact is maintained.
