Abstract (en)

[origin: EP2062725A1] The press (1) has a liquid part recovery tank (5) provided with a decanting device (33) and a radially projecting plate (39) on a cage (2), where an outlet orifice (37) of the decanting device opens through the plate. The tank has a liquid drawing device (40) with a slider (46) placed in a retracted position, in which the slider does not restrict rotation of the cage, and a deployed position. The slider is placed against the plate by sealingly supported around the outlet orifice in the deployed position when the cage is in a preset angular pressing position.
