Abstract (en)

[origin: EP2062798A2] The system has a control signal supplying unit for supplying a control signal when a respective chair (3) is moved to a station. A circlip (31) is moved from a closed position to an open position by a passenger e.g. skier. The chair has an optical and/or acoustic indicator and a receiver. The indicator is triggered by the control signal. The circlip is released for pivoting in the open position, by the control signal. The chair is fixed to a traction and supporting cable (1). The chair is uncoupled from the cable at the station.
