Abstract (en)
The invention is a new recessed element or module for the vacuum packaging of products (A) comprising a vacuum packaging machine (M), suitable for being partially or totally recessed inside at least one containment structure (T1), and at least a system of elements or guides (G) for sliding said packaging machine (M) in relation to said containment structure (T1), wherein said vacuum packaging machine (M) can slide from a position in which it is totally or partially extracted from said containment structure (T1) to a position in which it is totally or partially withdrawn inside said containment structure (T1), and vice versa.
