Abstract (en)

[origin: EP2062826A1] The tote box has a base (1) and side walls (2,3), and is made of plastic. The side walls are moving inward, and are held by a bolt (7) in perpendicular position. The side walls carry flexibly displaced bolt and carry the locating bar (6). The locating bar grips the side walls from inside and supports these from back wards. The side walls are adjacent to the locating bar. The locating bar is provided with springy release lever (11) during lying of side walls, and the release lever is placed in the openings of the side walls.
