Abstract (en)

The invention relates to a monitoring device for a lift comprising a control unit (10) and a safety device (20) with several safety units (30, 40) for monitoring the function of the lift. The safety device (20) is connected to the control unit (10). Further, the control unit (10) and the safety device (20) communicate with each other via a wireless optical data communication. Furthermore, the invention relates to a lift and to a method for monitoring a lift comprising a lift car.
