Abstract (en)

A mechanism (8) is provided and arranged for temporary stowage of an inactive spreader in the lower side of a crane trolley, by which mechanism the spreader is moved out of the way for crane ropes which operate an active spreader from the same trolley. The mechanism is arranged to be suspended from the trolley and in stowage docking to the stowing spreader, and arranged detachable from the trolley to be supported by the stowing spreader. A method for providing temporary stowage of an inactive spreader in the lower side of a crane trolley is likewise provided, by which method the inactive spreader is moved out of the way for crane ropes which operate an active spreader from the same trolley.
