Abstract (en)

[origin: EP2063035A1] The element (10) has a rectangular block (12) including an inner face (14) and an outer face (16) connected together by a bracing and connecting unit (18), where each face is realized in a wood piece. The unit includes U-shaped spacers (20) provided with branches (22), where each branch is provided to cooperate with holes (28) formed in the inner and outer faces, respectively. The spacers are provided with a base (24) arranged on top of a housing (30). Notches (26) protrude along direction perpendicular to each branch. An independent claim is also included for a building obtained from a construction element and comprising a profile to receive a block of a construction element.
