Abstract (en)

[origin: EP2063059A2] The window or door has a glare and wing framework (1.2). A ventilation device (10) is provided and having a first section (15) which is arranged between the window frames (1) and a side framework (2). A second section (16) is provided over a wing part (12) and which starts from a surface (17) blended with the framework (1) and which encompasses the wing part.
