Abstract (en)
[origin: EP1811226A1] The invention to which the application relates is a lighting means which is provided in a form to allow at least two lighting functions to be created. A first lighting function is in the form of a torch and the second function is as a nightlight with a glow lighting effect. In one arrangement the lighting means include a housing and a further part with which the housing can be selectively located. When separate from the further part the housing can be used as a torch and/or image projecting device and when located in position on the further part the lighting means can be used as a nightlight.
