Abstract (en)

[origin: EP2063180A2] The method involves activating a heating element (8,9) for heating a cooking area (4) up to a pre-determined temperature (Tg), and sequentially shifting down a heat output (P) of the heating element for the cooling down the cooking area (4) under the pre-determined temperature. An independent claim is included for a method for a cooking device for the execution of an operating method.
