Abstract (en)  
[origin: WO2008034766A2] The invention relates to a craft oven having - an oven housing, - an oven door (2), which is connected to the oven housing in an articulated manner on one side, and - interacting sealing elements (26, 27, 31, 32) on the door (2) and in the region of the door opening of the oven housing, the sealing elements comprising at least one flexible seal (26, 27, 31, 32) and a sealing-abutment surface, and the sealing elements (31, 32) which are arranged in the vicinity of the top door periphery and in the vicinity of the bottom door periphery differing from one another. The object of the invention is to improve the possibilities for fitting the door alternatively with right-hand hinge mounting and left-hand hinge mounting. This object is achieved according to the invention in that the sealing elements arranged on the door (2) in the vicinity of the top and bottom door peripheries are fastened on the door (2) in a releasable (31, 32) and interchangeable manner.
