Abstract (en)
[origin: WO2008022732A1] The invention relates to a locking and unlocking device (1) comprising at least one displaceably mounted locking element (7, 7') and an actuating element (2) that can actuate the locking element (7, 7'). Said device is characterised in that it comprises a deformation element (4) that can deform when the actuation element (2) is actuated thus displacing the locking elements (7, 7').
