Abstract (en)
[origin: WO2008028718A1] Method for verifying information (24, 26, 28) which is exchanged between vehicles, an electronic unit and a computer program and a computer program product are presented. The described method provides that signals which are received and which bear the information (24, 26, 28) are used to determine at least a variable which relates to at least one of the vehicles, and the information (24, 26, 28) is treated on the basis of this determination.
