Abstract (en)

[origin: EP2065176A2] The press has a compression station arranged on a circle with upper and lower compression rollers, which co-operate with upper and lower punches. The compression rollers are adjustable in height by a compression roller drive, where a dosage drive and the compression roller drive include identical installation units. A stand includes upper and lower accommodation platforms (10, 12) that include identical accommodation units for the installation units on sides facing each other, where the accommodation units are in a coincident arrangement with respect to each other.
