Abstract (en)
[origin: US2009103965A1] A web-fed printing press is disclosed. The press having at least one printing unit for printing at least one printing substrate web, and having at least one processing device for processing the at least one printing substrate web, a control device for controlling the at least one processing device, and a fastening device for arranging the at least one processing device at an arbitrary web feed position between a reel changer of the web-fed printing press and an exit of a folding unit of the web-fed printing press in such a way that the at least one processing device is able to process the printing substrate web on an upper side and/or on a lower side and/or on one or both edges of the same.
