Abstract (en)
[origin: EP2065302A1] The submarine has a pressure body (2) pressure-tightly locked with a cover (12) that is guided at the pressure body. Two-piece pivotable linings (30, 32) are mounted at an outer side of the cover, where the linings form a part of a bodysell (20) of the submarine. The cover and the linings are coupled with one another in a moving manner, where the linings comprise a lining part, which is firmly connected with the cover. The linings comprise another lining part, which is pivotable around a pivot axis spaced from a pivot axis of the cover.
