Abstract (en)
[origin: EP2065311A1] The pallet has a plate (3) comprising superimposed lower and upper panels (4, 5) connected with each other. The lower panel has two adjacent semi lower panels on one of its sides, where the semi lower panels are not connected along the side. A tear-strip (6) is integrated to the upper panel. The upper panel is divided into two semi upper panels by the strip. An assembly of each semi lower panel and semi upper panel forms the plate of a semi-pallet. The strip is made of traction resistance material such as fibrous plastic material.
