Abstract (en)

The present invention provides a multiple yarn interlacing device that interlaces a plurality of yarns and which requires a reduced number of components and allows the pitch of yarn paths to be reduced, the device further having a simple configuration. The multiple yarn interlacing device 100 includes a first member 2 having a plurality of yarn traveling spaces 1 formed as spaces through which respective multifilament yarns Y travel and a second member 4 having a plurality of fluid injecting holes 3 through which a fluid to be injected into the respective yarn traveling spaces 1 flows.
