Abstract (en)

A method for installation of a wall insulation panelling (10) of a building (100), comprising a stage of arranging insulating panels (2) to form an insulation panelling (10) covering at least a part of a wall surface (101) of a building (100), characterised in that it comprises a stage, preceding the stage of arranging insulating panels (2), of associating at least a corner element (3) to a corner edge (102) of the wall surface (101), the corner element (3) being a conforming structural part of the insulating panelling (10) and further performing a function of positional reference for a following installation of insulating panels (2).
