Abstract (en)

[origin: EP2065984A1] The plug connector has multi-pole bushing bases (2, 3) arranged in parallel at an elongated contact bushing holder (1) in a longitudinal direction. The bushing bases are designed as single-row or multi-row contact strips, which extend in the longitudinal direction of the contact bushing holder. The bushing bases are firmly connected with a multi-core connection line (10) at a preset length. Counter contacts for the bushing bases are arranged in contact sockets.
