Abstract (en)

[origin: WO2008034705A1] The invention relates to a water-conducting domestic appliance, in particular a domestic dishwasher, comprising a detergent dosing system (10), the latter (10) having a detergent dispenser (11) with a receiving compartment (15) for receiving at least one cartridge (50). Said cartridge (50) is designed to hold at least one detergent. The invention is characterised in that the amount of detergent that can be held is greater than the amount required for a washing cycle and that the receiving compartment or compartments (15) is or are designed in such a way that when the door (3) of the water-conducting domestic appliance is partially open, at least one cartridge (50) can be introduced into the receiving compartment or compartments (15).
