Abstract (en)

[origin: WO2008041106A2] The invention relates to the preparation of drugs useful in the treatment of hypertension and cardiovascular disease, glucose metabolism disorders, dyslipidaemia, appetite and energy metabolism disorders and inflammatory states, through the administration of compounds which are natural and/or synthetic ghrelin analogues and growth hormone secretagogue receptor agonists and antagonists which block or inhibit the renin-angiotensin system in humans by interfering with the activity of the circulating and tissue ACE enzyme and/or with the angiotensin II receptors and/or with the breakdown of peptide Ac-SDKP.
