Abstract (en)

[origin: CA2660797A1] The invention relates to a method for the provision of a convergent messaging service for at least one terminal in a mobile radio network system. According to said method, a working unit (2), comprising a client function and designed to communicate with at least one network (1) that provides the convergent messaging service, is set up in said terminal or terminals. The invention also relates to a suitable working unit.
