Abstract (en)
[origin: EP2067417A1] The carrying strap has a strap section, which is formed in a double-walled manner to form a bag (1) with sections. A contact opening is provided in an area of the double wall strap section. The contact opening is sealed by a closure unit (2). An additional bag is arranged in the bag with a large receiving volume proportional to size of the bag. The additional bag has another contact opening. The additional bag is connected with the carrying strip at a point, and is inserted in the bag in a folding manner.
