Abstract (en)
[origin: EP2067709A2] The pallet has two identical plates (2), and a coupling unit (3) arranged at a longitudinal side (4) of each plate. The coupling unit has a gripping element (3a) and a support element (3b). The coupling unit is arranged at the longitudinal side such that a distance of the gripping element from a transverse side (7) of the plate corresponds to a distance of the gripping element from another transverse side of the plate. The gripping element of one plate cooperates with the complementary support element of the other plate.
