Abstract (en)
[origin: EP2067904A2] The invention relates to an interior wall system (1) comprising stud members (3) of wood or wood fibres, insulating material (6) and opposing linings (5). The linings (5) are supported by the stud members (3). Further an insulating material (6) is received in cavities (11) defined by the stud members (3) and the linings (5). Each stud member (3) comprises two opposite end surfaces (16) which each make contact with a lining (5) and which are horizontally offset relative to each other parallel to the plane of extension (A) of the linings.
