Abstract (en)
The device has a hanging provided in form of an awning cloth (2) and supported in a pullable and extendable manner. Two rails are fixed at the awning cloth. One of the rails runs along a lower edge of the awning cloth, and another rail runs in a distance parallel to the former rail, where the distance is adjusted to a periphery of a drop rod (4). The awning cloth is fixed at the drop rod such that the segment of the awning cloth between the rails clasps the drop rod and the two rails are connected together, where the rails are designed in an identical manner. An independent claim is also included for a method for exchanging of pullable and extendable supporting hanging of a shading device.

Abstract (de)
Die Erfindung betrifft eine Beschattungsvorrichtung (1) die einen Behang, der ein- und ausfahrbar gelagert und dessen unterer Randbereich an einer Fallstange (4) befestigt ist, umfasst. An dem Behang sind zwei Schienen (7a, 7b) befestigt, wobei die erste Schiene (7a) entlang des unteren Randes des Behangs und die zweite Schiene (7b) in einem an den Umfang der Fallstange (4) angepassten Abstand parallel zur ersten Schiene (7a) verläuft. Der Behang ist an der Fallstange (4) dadurch befestigt, dass das Segment des Markisentuchs (2) zwischen den Schienen (7a, 7b) die Fallstange (4) umschlingt und die beiden Schienen (7a, 7b) miteinander verbunden sind.
