Abstract (en)
[origin: EP2068083A2] The present invention refers to the field of household appliances, particularly free-standing and built-in cooking ranges and built-in ovens, and in particular to an upper heating unit comprising at least one tubular heater. It is provided for according to the invention that at least two heaters (1, 2) are arranged inside an oven (5) in the area of the ceiling section (4) thereof, said heaters being vertically spaced apart relatively to each other and attached to the back of the oven (5) by means of a common flange (3).
