Abstract (en)

[origin: WO2008033253A2] Liposome complexes are provided for site-specific delivery of pharmaceutical agents with improved targeting efficiency. The liposome complexes include a pharmaceutical agent associated with the liposome; a sialic acid-containing molecule associated with the liposome; and optionally a targeting agent attached to the sialic acid-containing molecule. The invention also provides methods of making liposome complexes and their in vivo administration.
